Engineering

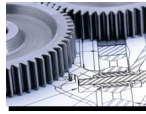

- Market estimates.
- Detailed design and engineering in mechanics, hydraulics, electricity, automation, instrumentation,
- Calculations of equipments and installations
- Records of achievement.

Manufacturing

- Assembly of mechanical, electrical, and electronic equipments.
- Manufacture of electrical cabinets of power, control, ... etc..

industrial Computing

- Programming of industrial robots.
- design of Systems SCADA DCS, BMS and GTC

Réhabilisation

- Renovation of industrial machinery, production chains, Installations of control command of any indu

Technical advices and support

- Diagnostics of mechanical and electrical installations.
- Advices and technical assistance
- Tracking studies and projects.
- Tracking assembly and installation
- Expertise and advices (increasing performance of installations, energetic audits...).

- Consultations, assessments and help to make decision.

Industrial assembly

- Completion of installations
- Assembly of installations and industrial production units.

Services

- Supply, installation of control equipments, instrumentation, monitoring, ...
- After sale assistance of all of our achievements as part of the warranty.
- Preventive and corrective maintenance of industrial Installations.
- Testing and commissioning of our projects.

Training

- Operators training on their Installations.
- Training of maintenance staff.
- Customized training in the industrial engineering fields.
